

# GAME DAY LIGHT INSTRUCTIONS

## Basic Setup

(Use the same process with either the Static or Advanced Controller.)

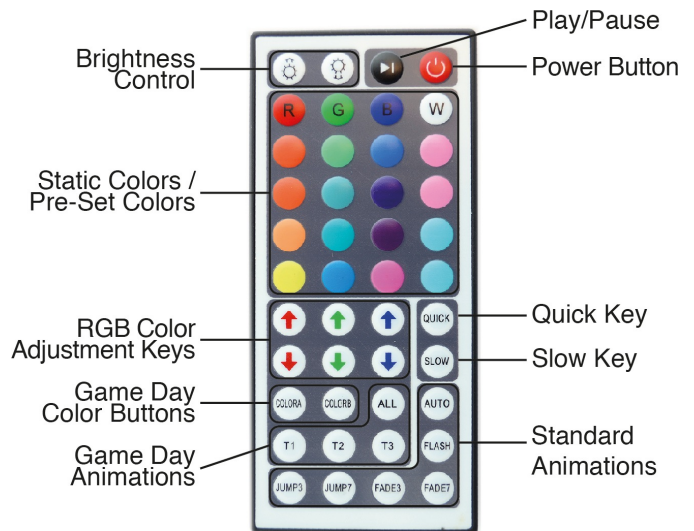

1. Plan setup location. Note location of wall outlets.
2. Strips include strong 3M® adhesive tape for long term installations. Peel the backing and stick to a smooth, clean and dry surface.
3. Plug in your 12V DC Power Adapter to a standard 120V AC outlet.
4. Connect the DC Power Adapter barrel plug into the control receiver.
5. Attach control receiver to Game Day LED light strip:
  - A. Align Arrows from the strip's female connector with the receiver's male connector.
  - B. Push in firmly.
  - C. Securely fasten the threaded sleeve coupling.
  - D. Repeat this process to attach multiple Game Day light strips together.

## Game Day Advanced Controller

(for use with the Advanced Controller only)

### BASIC CONTROLS

1. After the system is set up, use the power button to turn on your strip.
2. Brightness Control (Increase or decrease brightness)
3. Static Color Options (Pre-Set Colors for easy access)
4. Standard Animations (Pre-set animations and Colors)
5. Quick & Slow Keys (Speed up or slow down animations)

### GAME DAY CONTROLS (METHOD ONE)

1. Press the Game Day ColorA Button.
2. Press the desired color from the static color options.
3. Press ColorA again to save your first Game Day color.
4. Repeat steps 1-3 using the ColorB button instead.

### GAME DAY CONTROLS (METHOD TWO)

1. Press the ColorA button.
2. Press the closest static color option to your desired color.
3. Use the up and down RGB (Red, Green, Blue) color adjustment keys to match your desired Game Day color.
4. Press the ColorA button again to save your first Game Day color.
5. Repeat steps 1-4 using the ColorB button instead.

### GAME DAY ANIMATIONS

You may use the All, T1, T2 and T3 display modes with your customized Game Day colors.
